TANEASY G

PREMIUM solution. From a specific chemistry, special universal compound (tanning, retanning) suitable for all pre tanning system (WB, WW). It can be used in combination, **but alone it reveals its full potential by giving the leather exceptional roundness and fullness.** Its good light resistance also makes it suitable for producing white leathers or pastel shades.

TANEASY GS

PREMIUM solution. From a specific chemistry, **all-in-one compound**, low astringency, versatile suitable for all supports. It gives to the leather increased softness, roundness and guarantees a grain without shrunk. It helps the dispersion and good penetration of other products (tannins, dyes, etc.).

TANEASY S

PREMIUM Solution. SCRD innovative concept resulting from research and sustainable development, allows to streamline the process and reduce consumption of water, energy, products... Range of compounds with combined retanning and softening effects. It gives full leather and moderate softness while guaranteeing exceptional grain adhesion.

TANEASY XS

PREMIUM Solution. SCRD innovative concept resulting from research and sustainable development, allows to streamline the process and reduce consumption of water, energy, products... Range of compounds with combined retanning and softening effects. It gives full leather and softness. Clear in color, with good light fastness it is also suitable for white or light-colored leathers.

TANEASY XXS

Solution PREMIUM. SCRD innovative concept resulting from research and sustainable development, allows to streamline the process and reduce consumption of water, energy, products... Range of compounds with combined retanning and softening effects. It gives to the leather great softness. Particularly suitable for dry milled articles.
